

INTERACTIVE SHOW

An on-screen character. A live conversation.

We create interactive shows in which a digital character talks to the audience and invites everyone to join in.

DIALOGUE / EXPRESSION / GESTURE / SHARED FUN

The audience becomes part of the story.

This is more than a prerecorded video. The character answers questions, responds to the audience and leads a shared adventure. Dialogue, humour and expression turn the screen into a meeting place.

01

A character with personality

A new character or a digital version of your mascot. Appearance, personality, voice and animation.

02

The audience takes part

Questions, quizzes, riddles and shared tasks. A script with room for the audience's reactions.

03

The whole experience

Story, scenery and the way the show is run, tailored to the venue and the audience.

CHARACTERS. REAL VENUES. REAL AUDIENCES.

Beluga

Lotte World / South Korea

Dugong

Yeosu Expo / South Korea

Rybka MiniMini

KinoMagica / Multikino / Poland

KinoMagica: produced by Anivatar in collaboration with MiniMini+ and Multikino.

LIVE PERFORMANCE. AI AS A DEVELOPMENT DIRECTION.

In the productions shown, an actor controls the character and responds to the audience. We are also developing AI support and a hybrid format. The way the character is controlled and content is supervised is agreed for each show.

Let's bring your character to life.

Theme parks, museums, science centres, cinemas and brand events.
